door *façade* *roof* *balcony* *window* *front door* *side wall*
first floor *garage* *doorstep* *conservatory* *ground floor*

Exterior view

Interior view

Home repairs

Instructions for working with plaster

- Store plaster in dry conditions and for no longer than two months. Do not pile more than ten sacks on top of one another.
- Always add plaster to water and not the other way around. If water is added to plaster, the mix will not be smooth.
- After you mix plaster and water together, the mix starts to harden quickly. Plaster must be mixed in small quantities that can be used quickly.
- If the air is warm, plaster dries faster. Apply plaster quickly in warm conditions.
- Clean the tools used to work with plaster after using them. Dirty tools will damage the quality of the plaster.

Task 1

Find the English verbs in the instructions which correspond to the German verbs below.

- | | |
|----------------------|-----------------------|
| 1. mischen _____ | 7. erhärten _____ |
